**PROJECT INSTRUCTION**

**Project Assignment (20%) – Due 25/12/2021 | Presentation 26/12/2021 & 2/1/2022**

In this project assignment, you are required to work in **a group of FIVE (5)** to develop any web application using **ASP.net** framework accordingly. The duration of the project development is 5 weeks.

Instructions:

1. Develop your application using .NET framework and using C# language.
2. Your application must at least consist of **THREE (3)** submodules.
3. Your application must be connecting to database and consists of CRUD (Create, Read, Update, Delete) operations.
4. Your application must be able to run using IIS localhost server.
5. Write a **PROJECT REPORT**. It must include the following:
  - a. Cover page: Title of the project, group number according to AUTHOR, team members, Matric No and Section
  - b. Introduction to the project
  - c. Problem statement
  - d. Proposed system submodules
  - e. Project plan (Gantt chart)
  - f. System User Guide (README file in notepad)
  - g. Discussion/Conclusion
  - h. Attachment: *Project Assessment Rubric*

Submit your project file, presentation slide, report, and all the related files in the folder name as **GROUPNUMBER\_GROUPNAME**. Please ensure your application can be run properly.

example: **Group1\_TheHackers**,

- Project presentation will be conducted on Week 13 and Week 14.
- Prepare a short presentation with PowerPoint slides, to last about 10-12 minutes (questions including), where you will demo your application at the same time.
- All group members must be participating in project presentation.
